

On the Subject of Kilo Talk

Perfectly balanced...as everything should be.

- Convert the weight of the first unit to the second unit according to the table below. Tap the screens to change the number and tap the grey button to submit.
- The row is the first unit and the column is the second. Multiply the weight by the number shown. Drop all decimals and use the last three digits.

420 pounds to ounces

	Newton	Gram	Kilogram	Tonne/Metric Ton	Slug	Pound	Ounce	Ton
