

On the Subject of Label Priorities

[Insert obligatory WOF joke]

The module contains 4 buttons, each with a different label.

Use **The Label Priority List** below to determine each button's priority.

To disarm the module, press the 3 highest priority buttons in order from the highest priority to the second lowest. Do NOT press the one with the lowest priority.

Pressing the incorrect button, or pressing a button out of order will register a strike and reset the module with new labels.

THE LABEL PRIORITY LIST

Press this button first.
ALWAYS press this button first.
You must press this button first.
You should press this button first.
