

On the Subject of Keypad Combinations

0849 2840 2984 7284 2984 1762... UGH. What was my pin number again?

On this module are 4 circular buttons and a display. Input the valid password combination, clicking each number to change the value (the number is read in reading order). Select the display to submit a password. Each button has 3 options making 81 possible combinations. There can be only one correct combination, so what is it?

Valid Passwords:
