

On the Subject of Matchematics

Can you make the match?

This module shows an incorrect mathematical expression created using matches. Using the instruction at the top, make the equation true. Click on a segment of a digit to add or remove a match. If the equation is incorrect or you didn't follow the instruction, a strike will be recorded.

The "%" sign represents the modulo operation, which is the remainder after a division.

The valid match arrangements are based on seven-segment displays, examples of this can be found below.
