

## On the Subject of Atbash Cipher

*R nvn1iravw Zgyzhs! - cerulean*

A 15-letter message will appear on a display screen which has been enciphered using Atbash. Decode it and input your answer, using: 'C' to cycle the smaller display through the alphabet and by pressing the letter next to the 'C' button to input the currently selected letter.

The big display can be pressed at any time before the 15<sup>th</sup> letter is inputted to clear your input.

The module will automatically submit when 15 letters have been inputted into the module.

If the string is correct, the module will be solved. Otherwise, it will cause a strike and reset the module.

### Appendix Bashly: Atbash decryption table

Encrypted letter	A	B	C	D	E	F	G	H	I	J	K	L	M
Decrypted letter	Z	Y	X	W	V	U	T	S	R	Q	P	O	N

Encrypted letter	N	O	P	Q	R	S	T	U	V	W	X	Y	Z
Decrypted letter	M	L	K	J	I	H	G	F	E	D	C	B	A
