

On the Subject of Boolean Math

I love sitting by the bool with a nice cold glass of lemandade.

Use the top screen as the first input and the middle screen as the second input. Perform the boolean operator listed on the right screen on the two inputs and submit it using the 1 and 0 buttons.

		
11000110		^
10100100		
0	10000100	
1	SUB
