

## On the Subject of Siffron

*Why are there so many words that mean 'blue'!?*

- This module has 4 buttons with Korean words on it.
- Each word is the name of a shade of blue in Korean.
- Use the table in the next page to get information about colors.
- To solve the module, you must press every correct button according to rules in any order.
- Pressing a wrong button will cause a strike and the module resets.

### Rules

- If there are more than 3 batteries on the bomb, press the button whose **Blue Value** is greater than 180.
- Otherwise, if there is an indicator with label IND or SND, press the button whose **Hue** equals to 214 or 240.
- Otherwise, if the serial number contains a vowel, press the button whose **Cyan Value** is greater than 80%.
- Otherwise, if a serial and parallel port are present, press the button whose **Blue Value** is divisible by 5.
- Otherwise, if there are no batteries, press the button whose **Brightness** is greater than its **Cyan Value**.
- Otherwise, press the button with the **Brightest color**.

Color	Name	Blue Value	Cyan Value	Hue	Brightness
	남색	79	100%	221	31%
	새파란	170	90%	214	67%
