# On the Subject of Symbolic Tasha

This module is so worn down. It's forgotten because no one recalls of who Tasha is. Let's hope we don't have to repair the glass.

This module looks like a Tasha Squeals module, except that the base is gray and some symbols can faintly be seen through the glass of the buttons.

Note the color flashing, and its symbol. For each stage, use the first table below with a true condition above it. Take the column containing the symbol, find the color flashing in that column, and press the button that's in the left-most column of the flashing color's row. If the symbol is missing from the chart, or the flashing color is missing from the column, press pink. In every stage after stage 1, also press every other button pressed in order from the previous stags.

Buttons that are pressed will shatter. After a button is shattered, the symbol can no longer be seen. Shattered symbols are represented with red coloring on the tables below.

Although some of the conditions may change, consider the conditions as they were when the stage was generated.

At least 2 strikes OR module is on stage 1
