# On the Subject of Unown Cipher

გ𝔢ꝑ𝔰𝔢 ꟼ⍟◎𝔶

This module has 5 Unown letters you can change using the up and down arrows, 4 stat values at the bottom, and a "SUBMIT" button at the top. To solve the module, submit the correct sequence of 5 Unown letters. If an incorrect sequence is entered, a strike will be recorded.

Clicking on an Unown letter shows 4 stats at the bottom. Use these numbers to decrypt the letter. Repeat the following process for each of the 5 Unown:

- Take each of the four stats and convert them to four-digit binary numbers.
- Take the middle two digits of each the four numbers in order as they appear on the module (red, yellow, blue, green) and convert them to a single eight-digit binary number.
- Convert this new binary number back into a decimal number.
- Divide the number by ten and round down to the nearest integer.
- Convert this to a letter based on its position in the alphabet (A=0, B=1, ..., Z=25).

List of Unown Letters:

A	⍨	H	◉	O	◎	V	⚉
B	⚇	I	⚲	P	⍴	W	⍱
C	⊚	J	⚵	Q	⚶	X	⚮
D	⊙	K	⚿	R	⍀	Y	⚥
E	⚭	L	⚘	S	⚯	Z	⚱
F	⚼	M	⊚	T	⚒	?	⚬
G	⚄	N	⍭	U	⚷	!	⚟
